Summary

A base to stabilize the aeropress when brewing upside-down

[Household](#) > [Kitchen](#)

Tags: [coffee](#) [aeropress](#)

For those who prefer to brew their coffee upside down, but don't want the thrill of their aeropress toppling over – this base will keep the aeropress steady as you brew your cuppa.

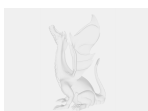

Print with variable layer height so the curves match the stamper, 15% infill is plenty.

Enjoy!
