### Summary

Adds a new arm with hot-swappable adapters and an extra adapter for my cheap heat insert iron

[Gadgets](#) > [Other Gadgets](#)

Tags: [press](#) [tool](#) [jig](#) [soldering](#) [heatinsert](#)  
[heartinsertpress](#)

I printed the test parts for the original model and quickly figured that all this needed were screws so it becomes a modular adapter, removing the necessity of reprinting the whole arm when changing iron, so here's all the original arms modularized.

I further added a shaped slide-in adapter for the cheap iron I dedicated to heat inserts. I have only printed that adapter, the others are based on the original step (v1.2, holder arms v36)

#### BOM

- 2x M3x10 Counterbore
- 2x M3x4x5 Heat-Inserts
