These labels clip right on to the handle of a IKEA HÅLLBAR trash bin. This way even with the bin open, the bins can quickly be identified.

### Printing

- First layer (and the only color-change) should be 0.3mm
- Make the first layer squish properly for a good finish
- The hinges need support, but just a little

**Update 2023-09-20:** In case you have problems with the hinges breaking off the part, try version V2. It extends more over the handle, but that allows for a thicker hinge base.
